Aim of the Conference

The scope of the conference is intentionally broad. It is devoted to aspects of modeling, computational handling, and applications of the listed topics. Original contributions and interesting applications are welcome. In particular, we foster papers that provide cross-fertilization between these topics. We invite researchers to organize stream sessions not only dedicated to a certain topic but to different approaches to the same problem as well.

Submission of Abstracts and papers

Those researchers interested in presenting their results in the conference must submit an abstract in English of about 250 words (to appear in the Abstract Booklet) and an extended abstract (2-5pages). A selection of the presented papers will be considered for being published in a special volume of the journal Investigación Operacional..

Deadlines for abstracts**: December 20, 2011**

Information about acceptance of the papers: February 1, 2012

Fees include the Welcome Party, Conference Dinner and a Volume of Abstracts.
