

**10th International Workshop on Operations Research:
Making Decision under uncertainty
Modeling Uncertainty
Havana, 11th -14th March, 2013
Dedicated to the International Year of Statistics-2013**

REPORT

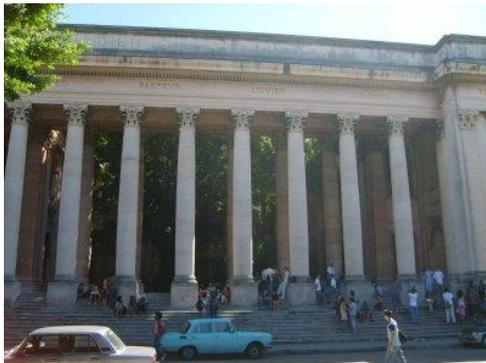

This workshop continued the tradition of developing a discussion on Operations Research with emphasis in a theme. This edition was devoted to issues related to modeling uncertainty for decision making. In this occasion its celebration coincided with the International Year of Statistics it was one of the activities, developed worldwide, acknowledging it.

The workshop was a forum where discussions of OR-scientists allowed exchanging ideas, results and experiences on the latest theoretical issues as well as in improving future applications.

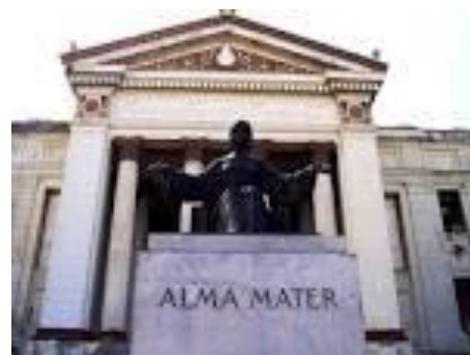

Some of the participants were coming for the first time, others repeated the experience. A selection of high-quality papers are going to appear in the next volume of our journal, where a selection of them will be published.

The organizers acknowledge the fruitful cooperation of Université Paris 1 Panthéon-Sorbonne, Universidad Autónoma de Guerrero, and Benémerita Universidad Autónoma de Puebla in the organization of the event. Oficina del Historiador de La Habana allowed to develop the workshop at the building of Colegio de San Gerónimo de La Habana.
